Alexandria Egypt

Motivated junior frontend developer focused on learning and growing with every project. Eager to contribute to my team and make an impact by building modern, efficient designs and solutions that support company goals.

EDUCATION

King Faisal University in (Saudi Arabia)

Bachelor Degree in Computer science (2016 -2020)

WORK EXPERIENCE

Globisoft

Frontend Angular – Full Time

Smouha Alexandria Egypt

4/2023 - Now

- Responsible for turning Figma designs into responsive, user-friendly websites. I develop efficient code and custom logic to meet project requirements, ensuring each solution is visually engaging, technically robust, and aligned with modern standards.
- Worked on an ERP system, building out core modules like POS and item management with Angular. Focused on creating responsive, user-friendly interfaces and tackling the complex business logic to make sure each feature was fully integrated and seamless for end users.
- Additionally, assisted with various development efforts and integrated new features to enhance existing projects.
- Developed a real estate website that enables users to search and filter properties and compounds effectively, as well as the control panel to manage listings. [Bloom Wealth Properties](#)
- Developed a digital menu that accommodates three service options: takeaway, delivery, and dining, providing users with a seamless and user-friendly experience. [Menu'n More](#)
- Developed a website for showcasing cars for sale, complete with an admin control panel for managing listings and site content. [amer.de](#)

eSar Information Systems

Frontend Angular – Full Time

Al Jubail Saudi Arabia

10/2020 - 4/2021

- Contributed to the AhelAlebl application, which organizes the Riyadh Camel Festival, collaborating with a team to develop features that streamline event management and enhance user engagement.
- build a control panel for a mobile application that manages the full lifecycle of the app, including listing data, creating users, and facilitating activities such as posting or creating events.

“ADVAC” Company (High speed)

Technical Support Training– Full Time

Dammam Saudi Arabia

5/2019 - 8/2019

- Worked as a Technical Support Trainer, assisting developers with minor tasks and visiting clients to understand their workflow. This role primarily focused on supporting the implementation and optimization of the ERP system
